DETAILED ACTION

Allowable Subject Matter

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest an eye characteristic measuring apparatus having a light source part that emits a light flux with a first wavelength; a first illuminating optical system configured to illuminate a minute area on a retina of a subject eye with the light flux from the light source part; a first light receiving optical system configured to receive a part of a reflected light flux reflected and returned from the retina of the subject eye through a first conversion member including a lens part having a long focal point or first sensitivity and configured to convert the reflected light flux into substantially at least 17 beams; a second light receiving optical system configured to receive a part of the reflected light flux reflected and returned from the retina of the subject eye through a second conversion member including a lens part having a short focal point or second sensitivity and configured to convert the reflected light flux into substantially at least 17 beams, the first sensitivity being greater than the second sensitivity; a first light receiving part configured to receive the received light flux of the first light receiving optical system; a second light receiving part configured to receive the received light flux of the second light receiving optical system; a measurement condition setting part configured to set a measurement condition of the first and/or the second light receiving
